From our team:

Two years ago, a group of students had the dream of bringing together engineers, entrepreneurs, and innovators with a maker-spirit at heart to tackle real-life problems and build out hardware prototypes for their solutions in just 24 hours. Now, looking toward our 3rd annual conference—as the country's largest make-a-thon—we're so excited to announce **MakeHarvard 2020 coming this February!**

Our makers bring their diverse backgrounds in engineering, science, and business to develop projects which solve increasingly complex technical and societal challenges—from AI-enhanced navigation to improved trash collection. While learning from their peers and our team of mentors and receiving feedback from industry experts, our makers launch from making *inventions* with no broader reach to developing technology *innovations* which could *impact populations*.

Our organizing team is extremely dedicated and creative, and each year using student and sponsor feedback, we strive to make our event better than ever for our makers. Like last year, we have set our sights higher and hope to welcome an even larger group of students with a wider array of unique talents and interests to give our makers the flexibility to build even better projects. **But this is only made possible with your financial support.** More makers means more space, more food, and of course more materials!

We rely on your company's generosity to help us raise the bar each year for our makers. In return, we ensure that as sponsors, you not only receive recognition for your support, but also a chance to recruit the world's smartest and most innovative minds! Past sponsors have had the opportunity to network with students, lead workshops, and even host their own specialized competition categories, judging and celebrating the best projects with us at our closing ceremony.

On page 9, we outline our sponsor packages. And if there is anything else you would like to do as a sponsor beyond what's listed, our sponsorship team would love to work with you to craft a unique package which might better meet your needs.

In the following pages, catch a glimpse of MakeHarvard over the years. If you are interested in sponsoring our event or have any questions, please don't hesitate to reach out. With your help, we hope MakeHarvard 2020 will be unforgettable, **so join us and make!**

2000+
square feet of makerspace

2
machine shops

1000
pcs. of fried chicken

15
3D printers

75
µcontrollers

2019 by the numbers.

310+ makers

24 hours

975+ applications

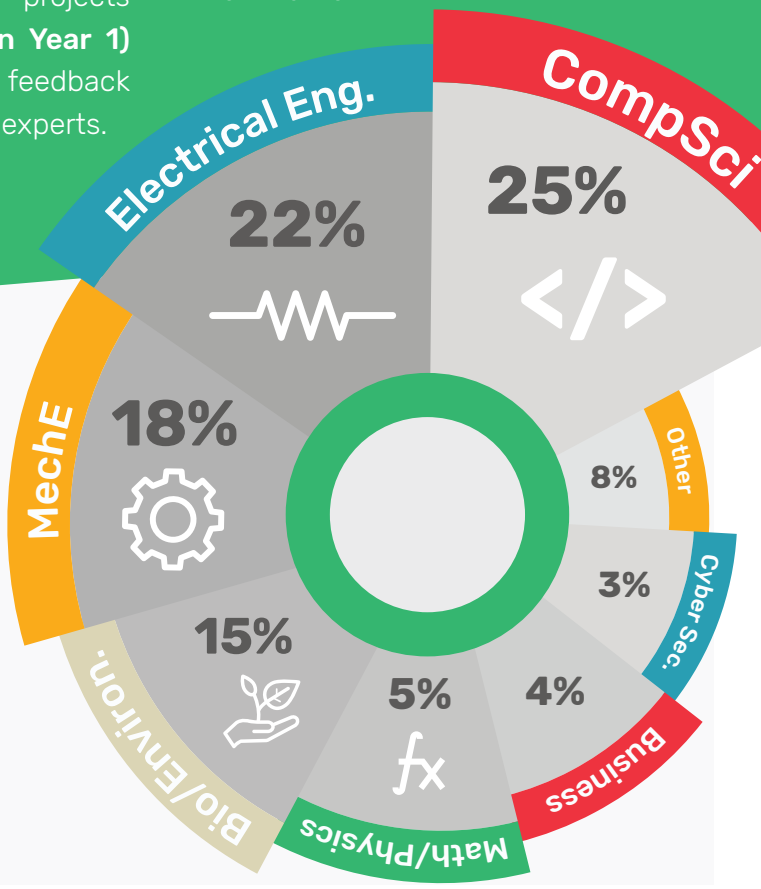
We nearly **doubled** our number of applications from Year 1, and we hope to grow our outreach in the years to come to bring together an even more diverse group of makers.

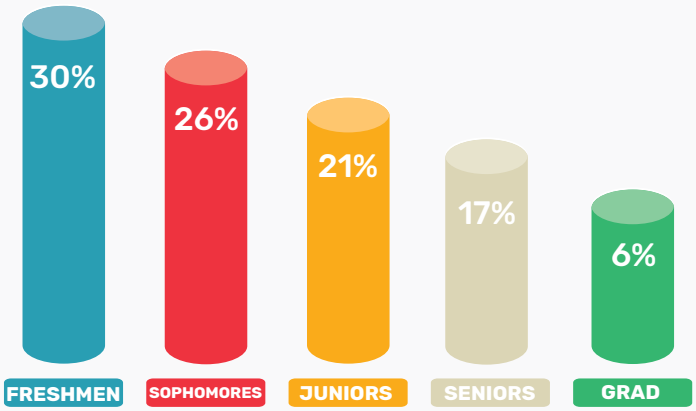
71 project submissions

In just under 24 hours, **71 teams** completed and submitted their projects **(up from 31 in Year 1)** for judging and feedback from industry experts.

8 competition categories

Alongside MakeHarvard's 3 area competitions, our **sponsors led 5** categories of their own.





20+47
mentors & volunteers

MakeHarvard is all that it is thanks to our mentors who make our conference a **learning** experience for all — as well as countless volunteers who continue to help us to grow bigger and **keep making**!

4
meals

Food is fuel for our makers! To ensure that their minds are well-equipped to think up big ideas, we make sure to take care of everything else so that they can just do one thing: **make**.

101
sleeping bags

Not all of our makers opt to stay awake overnight. We provide options to sleep on campus the night before our conference as well as at night during our 24 hours of making!
